

KENWARE
SECT. 2
STORM DRAINAGE

NOTES

See Map of Portion of Kenaware, Section No. 2, dated July 25, 1955, revised May 9, 1957, and "Profiles of S. Kenaware, Section No. 2", dated July 25, 1955, revised May 9, 1957, both maps made by Edward W. Boutelle & Son. Elevations refer to U.S.G.S. datum, Bench Mark not at point of arrow on hydrant at corner of Dawson and Kenaware Aves. Elev. 232.08.
a Denotes surface water inlet structure when on larger, and junction box when on 6" pipe.
b Denotes manhole, storm sewer system.
Any connection of 6" cellar water collecting system or larger storm water system should be made through pipe gate between junction box and inlet structure or manhole.

Note
Easements for cellar drainage in Block Q, R and U as shown on map of Section 2 filed by the A.C.C. Office.
